

SocNet 98 - International Week 23.4.- 27.4.2012

Transnational Aspects of Social Work

In the international week we will be looking at social problems of international scope – e.g. refugees, migration women trafficking etc. But we will also look at selected problems in social work where migrants are affected – and we will look at them in a transnational perspective. How are questions like domestic violence, child protection etc. dealt with in other countries?
